Hiring Manager
Arsanesia

Subject: Application for Game Programmer Position

Dear Hiring Manager,

My name is Eko Saputra, a final-year Information Technology student at Universitas Amikom Yogyakarta specializing in Game Development. I am excited to apply for the Game Programmer position at Arsanesia because I am passionate about creating interactive gameplay experiences and continuously improving my technical skills through game projects and experimentation.

Throughout my academic and personal projects, I have developed strong experience using Unity Engine and C# to build gameplay systems, interactive mechanics, and technical prototypes. I enjoy solving programming challenges, optimizing game logic, and designing systems that create smooth and engaging player experiences.

Some of the projects I have worked on include:

- **VR Study: Word Architect**
Developed a modular NPC navigation system using state-based logic and interactive 3D mechanics for a dyslexia therapy application in VR.
- **E-Waste Management Game**
Built a custom drag-and-drop interaction system with accurate screen-to-world coordinate conversion and responsive Coroutine-based feedback systems.
- **Spring Tide**
Designed a dynamic boat controller with physics-based buoyancy that reacts in real-time to wave simulations.

With a GPA of 3.93, I am highly motivated to keep learning and improving both technically and creatively. I value clean code, teamwork, adaptability, and problem-solving, and I am eager to contribute to a professional game development environment where I can continue to grow as a programmer.

I have attached my CV and portfolio for further consideration. I would greatly appreciate the opportunity to discuss how my skills and passion for game development can contribute to Arsanesia's projects and team.

Thank you for your time and consideration

Sincerely,

Eko Saputra
