

Eko Saputra

GAME DEVELOPER | UNITY & C#

Condongcatur, Sleman Regency, Special Region of Yogyakarta, Indonesia | | ekosaputra28a@gmail.com

Unity Developer Intern candidate with experience in developing 3D games and interactive media using C#. Currently a 6th-semester Information Technology student specializing in Game Development. Passionate about gameplay programming and interactive systems, and eager to grow in the game development industry.

PROJECT EXPERIENCE

E-Waste Interactive Media (3D)

Unity Developer

MARET JUNI 2025

- Developed a 3D interactive e-waste education application using Unity and C#, improving user engagement through real-time object interaction and feedback systems.
- Implemented object interaction system using C# (e.g., raycasting / trigger detection)
- Designed mechanics for separating and classifying objects based on categories
- Built UI system to display information and feedback to users
- Improved user understanding through interactive learning experience

World Architect (The Static Study) (VR)

JAN - FEB 2026

- Developed an interactive VR educational experience about e-waste using Unity and C#
- Implemented VR-based interaction system for selecting, grabbing, and sorting objects
- Designed multiple mini-games in VR, including:
 - Shooting mechanic to select the correct object/category
 - Object sorting by placing items into the correct container
 - Interactive object handling (grab & place)
- Applied classification and validation logic using C# to check user actions
- Built immersive UI and feedback system to enhance user learning in VR

EDUCATION

University Amikom Yogyakarta

Bachelor of Information Technology
(Game Development Concentration)

2023-PRESENT

TECHNICAL SKILLS

- Unity (3D & VR)
- C# Programming
- Physics & collision
- Object Interactions System (Raycasting / Trigger-based)
- VR Interaction (Grab, Select, And Object Handling)
- UI System (Canvas, Button, Basic UI Design)
- Scene Management
- Basic Animation & Asset Integration
- Git (Basic Version Control)
- 3D Player Locomotion System
- Character Movement & Control

LANGUAGES

- Indonesian (Native)
- English (Basic)
